OBJECTIVE

Software Engineer with 3+ years of experience in designing, developing, and optimizing scalable web applications and APIs using .NET Core, C#, and React.js. Adept at problem-solving, performance optimization, and delivering high-quality solutions. Seeking to leverage full-stack development expertise in a dynamic, growth-oriented role.

EDUCATION

Jawaharlal Nehru Technological University

June 2017 - June 2021

Bachelor of Technology in Computer Science and Engineering

SKILLS

Languages & Frameworks	C#, .NET Core, Python, JavaScript, React.js, HTML, CSS, WPF
Databases	Oracle, SQL Server
Version Control	Git
Cloud Platforms	Microsoft Azure
Tools & IDEs	Visual Studio, VS Code

EXPERIENCE

Software Engineer

Oct 2022 - Present

L&T Technology Services

Mysuru, India

- Optimized RESTful APIs, improving response times by 30% and enhancing system efficiency.
- Streamlined business logic and improved data processing efficiency by designing and implementing SQL scripts, packages, and procedures.
- Spearheaded Agile development, ensuring timely project delivery through active Scrum participation.
- Conducted rigorous code reviews, increasing code quality and maintainability.
- Minimized downtime and ensured high system availability by swiftly troubleshooting and resolving production issues.
- Mentored junior developers, fostering skill development and improving overall team efficiency.

Associate Engineer

Oct 2021 - Oct 2022

L&T Technology Services

Mysuru, India

- Developed and deployed full-stack web applications, improving UI/UX and application responsiveness.
- Collaborated with cross-functional teams to deliver scalable, high-performance applications.
- Automated testing processes, reducing manual errors and enhancing software reliability.
- Contributed to front-end and back-end development, ensuring robust and scalable application architecture.
- Designed and integrated RESTful APIs, streamlining client-server communication.

Software Intern [Clickhere](#)

Aug 2021 - Oct 2021

L&T Technology Services

Mysuru, India

- Developed robust ASP.NET MVC web solutions using C# and ADO.NET, improving application stability.
- Designed and implemented WCF services for seamless inter-application communication.
- Assisted in all phases of SDLC, from requirement analysis to deployment.
- Documented code, services, and deployment procedures for future scalability.

PROJECTS

Enterprise Integrated Management System - OneRing,

Tech Stack: C#, .NET Core API, Oracle, Angular

- Developed high-performance software applications and dashboards, ensuring clean, maintainable C# code.
- Implemented advanced algorithms and data structures, optimizing system functionality and scalability.
- Optimized RESTful APIs, resulting in a significant improvement to overall application performance.
- Designed and optimized SQL scripts, improving data processing speed.
- Debugged and troubleshoot development issues, ensuring smooth deployment.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900) - [Microsoft](#)
- SQL Intermediate Certification - [HackerRank](#)
- Programming in C# Certification - [Sololearn](#)

HONORS & AWARDS

- **Spot Award** – Recognized at L&T Technology Services for outstanding performance and contributions.
